

All that glitters / Protection meets style

WHEN YOU NEED TO TURN YOUR SUPERYACHT GOLD - or any other colour, there is only one company you can turn to with absolute confidence...

LuxWrap, the World Leader in 'Superyacht Vinyl Wrapping & Finishing', routinely undertakes projects on a scale never seen before. With an enviable reputation for service and reliability, it is no wonder that LuxWrap is the 'go to' company for many of the world's largest and most respected Superyachts, Megayachts and their owners.

A trailblazing business responsible for the largest ever gold chrome Superyacht wrap (55m), and others in the 40-60m range. LuxWrap is set to complete the largest ever Megayacht wrap (115m) shortly after exhibiting at this year's Monaco Yacht Show, the world's premier luxury event.

It is fair to say that LuxWrap's ability to deploy quickly and transform a vessel's appearance whilst still in the water in days rather than months, puts them in a unique position with few, if any peers.

"Painting Superyachts is both expensive and time consuming, yet it must be done at least every 8-10 years. Wrapping on the other hand is 1/10th the cost and also lasts several years." Said LuxWrap's Founder

Continuing... "By contracting LuxWrap, you are making a decision to protect your paint, which is a capital asset, with your style, which is whatever you want your yacht to look like this season. So whilst our service may offer huge style potential, it has enormous utility and long term cost benefits."

With a company like this in the market, we don't think it will be long before more Superyachts start changing colour! What do you think?
